Where do we go from here?

Denise A. Spangler
University of Georgia
Disclaimer

- I have become a skeptic.

- Clarke County School District, Athens GA
  - 12,000 students, 21 schools
  - 70% of students live in poverty, one of 30 poorest counties in the country when the measure used is persistent, intergenerational poverty
  - 8 made AYP in 2009
  - All 14 elementary schools and all 4 middle schools made AYP in 2010; high schools barely missed it

- PD done internally
  - Data teams
  - “Just in time”
Meeting teachers where they are

- Lach: motivation
- National Council of Teachers of Mathematics Research Agenda Conference (and subsequent publication)
  - Content is not the most pressing concern of practitioners
Context

- STEM ed reform ⊆ educational reform
- Who else needs to be part of the conversation?
  - State level DOE partners
  - K-12 partners, including
    - Special educators
    - ESOL educators
    - Administrators
  - Statisticians/statistics educators
- Are they here?
- Do we attend their conferences? Write for their journals?
False dichotomies

- Content vs. methods
- College of education vs. arts and sciences
Capacity problem

- Not enough people to do this work
- Not enough mathematicians who “get it”
- Demographics of professors
- Mobility rate and attrition rate of teachers from K-12 schools
- (Do we really know what we are doing? How many of us have done what we are asking/telling teachers to do?)
Self-sustaining, site-based learning

- Too many teachers, too few of us to do it all
- Mobility, attrition mean that it’s not a “once and done” thing
- Content is so wide and deep that we can’t do it all in PD
- Mirrors the way the mathematics community operates (Clemens)
That said...

- There is still a place for a range of other PD models

- But
Getting our house in order

- Need to start with areas where we have converging evidence from theory, empirical research, and wisdom of practice

- Need to build a research base about what does work and under what conditions. “Evaluation” of PD is often an afterthought. Need to move from “shared beliefs” to “evidence.”

- Need a meaningful way to share
  - “What Should Have Worked Clearinghouse”

- Need to attend to our own PD
Getting our house in order, cont’d.

- Compare PD to K-12
  - No curriculum
  - No standards
  - No assessments
  - No data systems
  - No accountability

- What would “learning lines” look like? What are the “met befores”?

- Teaching as a profession...internally controlled
If I could be queen for a day (or two)...

- Students (at risk students in summer school, challenge programs, after school programs, community programs)
- Preservice teachers
- Inservice teachers
- Graduate students
- Higher ed faculty members from mathematics, statistics, education
Threats vs. opportunities

- Race to the Top “Pay for Performance”
- Reauthorization of the Elementary and Secondary Education Act (ESEA)…No Child Left Behind…all Title II dollars to school districts
- Private, for-profit companies that will do PD
- Take time to influence the process where you can
- But don’t assume it will go away
We need...

- Action in the short term
- Thoughtful, deliberate, coordinated planning for the long term
- Open minds
  - What do you need/want to know right now?
  - What form of PD would you choose for learning it?
Thank you

- CBMS
- Joan Leitzel
- Ron Rozier
- Bill McCallum
- Brookhill Foundation
- Speakers
- Breakout session facilitators
